

FINALUX PET 350 M

DESCRIPTION : Antiscratching & Slip additive for PET/PC

SPECIFICATIONS : Appearance : Microbeads
Melting point : 55 ± 5 deg C

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS : PET film sheet, PET bottles, PET injection molded products

PROPERTIES :
- Slip & anti-scratching additive in PET films/sheets by reducing the interfacial friction on the PET surface remarkably
- Suitable high thermal stability
- Can offer easy mould release; thereby, superior surface texture and end-product quality
- Reduction of the cycle time and minimized rejections through retention of visual properties of moulded articles

METHOD OF USE :
- By preparing a masterbatch
- Direct addition of pellets during extrusion process

USE LEVEL : 0.2 to 0.5 % (as per end-use requirements)

STORAGE : It may form soft agglomerates during transit/storage depending upon its particle size, compaction caused during stacking of material and prevailing atmospheric temperatures during transit/storage conditions due to its fatty nature & inherent characteristics. Finer the particle size more can be such agglomeration. However, this agglomeration does not affect the product's performance. These soft agglomerates can be broken easily if necessary.
